

Interim COVID-19 Visitation

<i>Date Implemented:</i>		<i>Date Reviewed/ Revised:</i>	9/27/2022	<i>Reviewed/ Revised By:</i>	Bailyn Walz
--------------------------	--	--------------------------------	-----------	------------------------------	-------------

Policy:

This facility will allow visitation of all visitors in resident rooms, dedicated visitation spaces, and outdoors. The public dining room is to be avoided and for resident use only. The visitation will be person-centered, consider the resident's physical, mental, and psychosocial well-being, and support their quality of life. Exceptions will be in accordance with current CMS directives and CDC recommendations, or as directed by state government (whichever is more stringent).

Policy Explanation and Compliance Guidelines:

1. The facility will monitor the status of the COVID-19 situation through the CDC website and local/state health department and will keep facility leadership informed of current directives/recommendations and the need for restricting visitation if indicated.
2. The facility will communicate this visitation policy through multiple channels. Examples include Everbridge and Monthly Family Newsletters.
3. The core principles of COVID-19 infection prevention will be adhered to and as follows:
 - a. The facility will provide guidance (e.g., posted signs at entrances) about recommended actions for visitor who have a positive viral test for COVID-19, symptoms of COVID-19, or have had close contact with someone with COVID-19.
 - b. Visitors with confirmed COVID-19 infection or compatible symptoms should defer non-urgent in-person visitation until they meet CDC criteria for healthcare settings to end isolation.
 - c. For visitors who have had close contact with someone with COVID-19 infection, it is safest to defer non-urgent in-person visitation until 10 days after their close contact if they meet criteria described in CDC healthcare guidance (e.g., cannot wear source control).
 - d. Hand hygiene, using an alcohol-based hand rub, will be performed by the resident and the visitors before and after contact.
 - e. A face covering or mask (covering the mouth and nose) in accordance with CDC guidance.
 - f. Screening Machine runs through COVID-19 signs and symptoms and must be completed prior to entry at least once per day.
 - g. Cleaning and disinfection of highly touched surfaces in the facility and in designated visitation areas after each visit will be performed.
 - h. Staff will adhere to the appropriate use of personal protective equipment (PPE).
 - i. The facility will utilize effective strategies of cohorting residents (e.g., separate areas dedicated to COVID-19 care).
 - j. The facility will conduct resident and staff testing as per current CMS/CDC guidance.
 - k. Visitors who are unable to adhere to these principles of COVID-19 infection prevention will not be permitted to visit or will be asked to leave.
4. Outdoor visitation will be conducted in a manner that reduces the risk of COVID-19 transmission as follows:
 - a. Visits will be held outdoors whenever practicable and will be facilitated routinely barring weather conditions or a resident's health status.
 - b. The facility will have an accessible and safe outdoor space (*court yard*) in which to conduct outdoor visitation.
 - c. All appropriate infection control and prevention practices will be followed when conducting outdoor visitations.
5. Indoor visitation will be conducted in a manner that reduces the risk of COVID-19 transmission based on the following guidelines:

- a. The facility will allow indoor visitation at all times and for all residents and will not limit the frequency and length of visits, the number of visitors, or require advance scheduling of visits.
 - b. Visits will be conducted in a manner that adheres to the core principles of COVID-19 infection prevention and does not increase risk to other residents.
 - c. Physical distancing should be encouraged during peak times of visitation and large gatherings (e.g., parties, events).
 - d. If the facility's county COVID-19 community transmission is **high**, everyone in a healthcare setting should wear face coverings or masks.
 - e. If the facility's county COVID-19 community transmission is **not high**, the safest practice is for residents and visitors to wear face coverings or masks, however, the facility can choose not to require visitors wear face coverings or masks while in the facility, except during an outbreak. The facility's policies regarding face coverings and masks should be based on recommendations from the CDC, state and local health departments, and individual facility circumstances. **Everbridge will inform visitors of community transmission level.**
 - f. Regardless of the community transmission level, resident and their visitors when alone in the resident's room or in a designated visitation area, may choose not to wear face coverings or masks and may choose to have close contact (including touch). Residents (or their representative) and their visitors should be advised of the risks of physical contact prior to the visit. If a roommate is present during the visit, it is safest for the visitor to wear a face covering or mask.
 - g. For residents who are on transmission-based precautions or quarantine, visits may occur in the resident's room and the resident should wear a well-fitted facemask (if tolerated). Visitors will be made aware of the potential risk of visiting and precautions necessary in order to visit and should adhere to the core principles of infection prevention.
6. When a new case of COVID-19 among staff or residents is identified, the facility will immediately begin an outbreak investigation and adhere to CMS regulations and guidance for COVID-19 testing, including expanded screening testing, testing of individuals with symptoms and outbreak testing.
 7. Visits will be allowed during outbreak investigations, but visitors will be made aware of the potential risk of visiting during the outbreak investigation and adhere to the core principles of infection prevention. If visiting, during this time, residents and their visitors should wear face coverings or masks during the visits, regardless of vaccination status, and visits should ideally occur in the resident's room. The facility may contact their local health authorities for guidance or direction on how to structure their visitation to reduce the risk of COVID-19 transmission during an outbreak investigation.
 8. While an outbreak investigation is occurring, the facility should limit visitor movement in the facility and visitors should go directly to the resident's room or designated visitation area and physically distance themselves from other residents and staff, when possible.
 9. Visitors will be notified about the potential for COVID-19 exposure in the facility (e.g. Everbridge regarding current outbreaks), and adhere to the core principles of COVID-19 infection and prevention, including effective hand hygiene and use of face coverings.
 10. Compassionate care visits will be allowed at all times.
 11. Visits required under the federal disability rights laws and protection and advocacy (P & A) programs will be allowed at all times. If the resident is in transmission-based precautions or quarantine and is in a county where the level of community transmission is substantial or high in the past 7 days, the resident and P & A representative should be made aware of the potential risk of visiting and the visit should take place in the resident's room.
 12. Ombudsmen who plan to visit a resident in transmission-based precautions or quarantine in the facility in a county where the level of community transmission is high in the past 7 days, the ombudsman and resident, will be made aware of the potential risk of visiting and the visit should take place in the resident's room.
 13. Alternative communication methods (phone or other technology) may be used if the resident or Ombudsman program requests it in lieu of an in-person visit.

14. The facility may ask about a visitor's vaccination status, however, visitors will not be required to be tested or vaccinated (or show proof of such) as a condition of visitation. If the visitor declines to disclose their vaccination status, the visitor should wear a face covering or mask at all times.
15. All healthcare workers will be permitted to come into the facility as long as they are not subject to a work exclusion or showing signs or symptoms of COVID-19. This includes personnel educating and assisting in resident transitions to the community.
16. Communal activities (including group activities, communal dining, and resident outings):
 - a. Communal activities and dining may occur while adhering to the core principles of COVID-19 infection prevention. The safest approach is for everyone, particularly those at high risk for severe illness, to wear a face covering or mask while in the communal areas of the facility.
 - b. Communal activities and dining do not have to be paused during an outbreak, unless directed by the state or local health department. Residents who are on transmission-based precautions should not participate in communal activities and dining until the criteria to discontinue transmission-based precautions has been met.
 - c. Residents are permitted to leave the facility as they choose. The facility will remind the resident and any individual accompanying the resident to follow all recommended infection prevention practices such as wearing a face covering or mask, especially for those at high risk for severe illness and when community transmission is high, performing hand hygiene and to encourage those around them to do the same.
 - d. Upon the resident's return, the facility should take the following actions:
 - i. Screen residents upon return for signs or symptoms of COVID-19.
 - a) If the resident or family member reports possible close contact to an individual with COVID-19 while outside the nursing home, the facility will follow the current CDC guidance in regards to testing and quarantine.
 - b) If the resident develops signs or symptoms of COVID-19 after the outing, the facility will follow the current CDC guidance for residents with symptoms of COVID-19.
 - e. In most circumstances, quarantine is not recommended for residents who leave the facility for less than 24 hours (e.g., for medical appointments, community outings with family or friends) except in certain situations as per the current CDC empiric transmission-based precaution guidance.
 - f. The facility will monitor residents for signs and symptoms of COVID-19 daily.
 - g. Residents who leave the facility for 24 hours or longer should be managed as a new admission or readmission and follow current CDC guidance.
