Dear Families and Friends

After many phone calls to the health department earlier this week on correcting the error to Sheyenne Care Center COVID positivity report. I'm notifying everyone that we have recently had five confirmed residents test positive. All family members of positive residents have been notified. Residents have been moved to our COVID area on 4<sup>th</sup> floor. After tracing the initial infected resident activities in the last 2 weeks, we have narrowed down the possible exposure to her clinic visit to Fargo. We have assigned designated staff to the 4<sup>th</sup> floor and are monitor residents conditions constantly. If you have questions please call. Thanks

Craig Christianson, CEO
